Intensive, Professional Training

Training courses by the Professional Thermographers Association (PTA) are understandably the most rigorous of all thermography courses available today.

Exceptional Results

The PTA trainers approach their students as professionals, and expect high levels of participation; in return, students achieve an exceptional level of thermographic proficiency in a relatively short timeframe.

Course Summary

Level I: Fundamentals of Infrared Thermography using Socratic and experiential teaching methods. Quality is the overriding principal of all course modules. Covered topics include data collection, corrections for distance and emissivity, qualitative v. quantitative thermography, optics choices for special applications, and creating reports useful for both engineer and all levels of management.

Level II: Students will individually execute complex quantitative thermal calculations and successfully measure subtle and/or camouflaged anomalies. Advanced Theory relative to new and more sophisticated applications and inspection techniques will be presented. This is a challenging program for experienced thermographers.

Level III: This best practices course is designed to bring Level II Thermographers to the point where they can initiate, develop, and manage successful Infrared Thermographic programs. This is the most advanced infrared training available and will cover topics to fully equip the student with the knowledge and understanding necessary to develop and implement standards-compliant written practices and procedures and to direct other thermographers.

2007 Course Schedule at the West Coast Training Center, Seattle WA

Level I Certification Course, February 19-22, 2007

Level I Certification Course, March 12-15, 2007

Level I Certification Course, April 9-12, 2007

Level I Certification Course, May 14-17, 2007

Level I Certification Course, June 11-14, 2007

Level I Certification Course, July 16-19-2007

Level I Certification Course, August 6-9, 2007

Level I Certification Course, September 10-13, 2007

Level I Certification Course, October 15-18, 2007

Level I Certification Course, November 12-15, 2007

[Level II Certification Course, May 21-24, 2007](#)

[Level II Certification Course, September 17-20, 2007](#)

[Level III Certification Course, March 20-23, 2007](#)

Pre-requisites:

Level I - None

Level II - Level I Certification

Level III - Level II Certification

Equipment Required:

Registrants are requested to bring the camera they generally operate, along with any peripherals for report generation. All other materials will be supplied by the trainers.

Fees:

\$1,495.00 includes tuition, materials, testing, and certification fees.

Accommodations:

Recommendations for local hotels and B&B's will be forwarded with registration confirmation.

Training Facility:

Bright, new facility just ten minutes from the airport, within walking distance of hotels, shops and restaurants. 15 minutes from Downtown Seattle.
